

HangFire™

BY ModFab™

ASSEMBLY

- Stand the base on a flat surface.
- Lower and align the upper cones onto the base.
- Secure with the 3 provided screws at the tabs.
- Fill each lower pan with gravel or glass.
- Drop a 4" diameter fuel canister into center opening.

INSTALLATION

Freestanding:

Place on a level, non-flamable surface capable of supporting 30lbs without tipping over.

Hanging:

Hang from a beam capable of supporting 30lbs. Screw a hook or eyebolt that is also capable of supporting 30lbs directly into the beam. Do not screw the hook or eyebolt using anchors or toggle bolts through sheet or panel materials. Only use the provided chain and connecting link. Professional installation is advised.

SAFETY

- Never burn anything other than fuel canisters.
- Keep out of reach of children.
- Do not use unattended.
- Do not use in confined areas without ventilation.
- Do not touch while in use.
- Follow the directions of the fuel canister.

CARE

- Keep and use only in a dry area.
- Clean with a mild solution of soap and water.
- Use a soft towel to wipe down.
